

Stroke video triage

Hull Royal Infirmary

Starting 3rd November 2025, stroke pre-alerts to Hull Royal Infirmary should be made by video

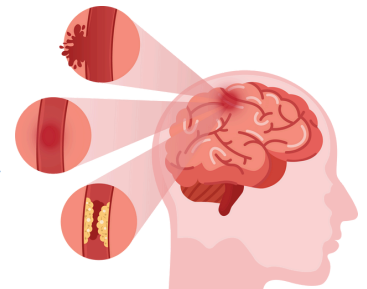

call on Microsoft Teams instead of telephone.

YAS clinicians making a call should provide an SBAR and then support the stroke clinician to remotely assess the patient.

Monday - Friday 09:00am-17:00pm

HRI Stroke Microsoft Teams address: hyp-tr.stroke.hri@nhs.net
Or search 'strokevideotriage' in Teams contacts

Video-calling the stroke team helps get patients the right care more quickly, by allowing the initial hospital assessment to take place earlier in the patient journey.

For full details, please visit the Pathways section in the JRCALC Plus app.

Please note that the video triage pilot is not the same as the SPEEDY trial. Staff who are selected to deliver the SPEEDY intervention should follow the SPEEDY pathway for eligible patients.
